

TESTIMONIALS FROM LEARNING EXCHANGE CUSTOMERS

MimioTestimonial: *"Mimio has allowed me to use my creative talents to write lessons that are appropriate for my students and other struggling learners. I see it as a wonderful support tool and can use it to target areas of need. I love to plan, create, trial and rework lessons. My students beg for Mimio"*

~Sonja Lambach Pavlik, Title I Teacher in Milwaukee

MimioTestimonial: *"We chose Mimio as our interactive solution because it was less expensive than other products and we did not have to deal with the challenge or expense to have it installed. With Mimio, we do not have to worry about bringing students to the technology; we bring the technology to our students.*

We have found Mimio to be very beneficial to our classrooms because we now have an interactive tool that has increased student engagement! We can change lessons on the go and my colleagues like being able to post notes and examples online by using MimioCapture.

Working with Learning Exchange was a positive experience; from the initial demonstration to the actual purchasing of our Mimio we give it a 9.9 out of 10! The more we use our Mimio, the more impressed with its capabilities. We look forward to future teachings with this comprehensive interactive technology!

~Willy Chambers, Blackhawk School District

Curriculum Loft Testimonial: *"We, as teachers, need to understand that we have to make a change. There is a hesitancy and reliance on textbooks. That is our world, which is not the world of these kids today, and not the one they will live in tomorrow. The proliferation of information is out there. The ability to access these digital resources, and how creative you can be with them, is amazing. This is the way they learn. This is the 21st century. We are already a decade into it; we need to evolve."*

~Bill Jensen, Director of Secondary Education, Bartholomew Consolidated School Corporation, IN

Training Testimonial: *"Purchasing MimioBoards and the Annual Plan was a great move for Blessed Sacrament School. The trainers have been phenomenal. They are able to help the teacher challenged by technology and the teacher experienced with technology. The trainers are very available and willing to answer questions. The Annual Plan made it possible for teachers to try different things in the classroom. There have been amazing lessons taught in all four classrooms that have MimioBoards. We are planning to purchase MimioBoards for the rest of our classrooms for the next school year."*

~Carol Degen, Blessed Sacrament School

Coaching Testimonial: *"In my coaching session, Lisa provided me with a lot of creative ways to use the Mimio in my classroom. She is really in touch with the needs of each individual teacher. I am now using the Mimio more and my students love it!"*

~ Jill Lorenzi, Teacher at St. Francis de Sales
